

GATE STYLE

Gate Construction:

Our Gates Use a header board with longer posts providing a solid frame to support the weight of the gate. The header looks nice while preventing the hinge post from leaning over time. We also install a diagonal brace (compression brace) to keep the gate from sagging overtime. Our latches can be opened from both sides and locked with a pad lock from inside your yard.

Heights: 4', 5', 6'

Post Sizes: 4x4, 4x6, 6x6

Gate Width: 4' max (double gates can be wider)

Design: Header is 2x6 set at 1.5' above top of gate, Gate frame is 2x4, Latch and Hinge hardware is black.

Material: Pressure Treated Brown (From Spray Laked Saw Mill), Cedar (Posts will be pressure treated due to cedar posts being brittle)

Custom Options can be designed. Contact us if interested
